FibreFENCE fencing systems and Gates:

- Frangibility in compliance to ICAO "Aerodrome Design Manual"
- Standards Certified Radio-Transparency: no interference with electronic control systems
- High chemical and mechanical resistance
- Electrical insulation and a-magnetivity
- No visual interference for the security personnel supervising...

Top Airports served

- Aéroport Paris-Charles-de-Gaulle, France
- Aeropuerto Internacional Ministro Pistarini Buenos Aires, Argentina
- Calgary International Airport, Canada
- Manchester International Airport, England
- Orio al Serio International Airport , Italy
- Baikonur Cosmodrome, Kazakhstan
- Aéroport Le Bourget, France
- Sofia Vrazhdebna Airport - Bulgaria
- Airbus Broughton facilities, UK
- RAF Marham Airbase - England

Fibre Net Spa was founded in 2000 in Udine (north-east of Italy), soon becoming a worldwide leader in the design and manufacturing of ground-breaking FRP (Fiber Reinforced Polymer) composite products, mainly used in the construction, building, consolidation, energy, transport and industry sectors.

Taking advantage of this extensive experience and knowledge, Fibre Net developed FibreFENCE, an innovative range of fencing systems and gates to meet the most challenging airport needs, especially in terms of FRANGIBILITY and RADIO-TRANSPARENCY, combined with high mechanical, chemical, UV-rays resistance and, last but not least, significant running and maintenance cost cutting.
