

Fibre Net Spa was founded 2000 in Udine (north-east of Italy), soon becoming a worldwide leader in the design and manufacture of ground-breaking FRP (Fiber Reinforced Polymer) composite products, mainly used in the construction, building consolidation, energy, transport and industry sectors.

Taking advantage of this extensive experience and knowledge, we developed FibreFENCE, an innovative range of fencing systems and gates to meet the most challenging airport needs, especially in terms of FRANGIBILITY and RADIO-TRANSPARENCY, combined with high mechanical, chemical, UV-rays resistance, and, last but not least, significant running and maintenance cost cutting.

## 21+

YEARS OF EXPERIENCE

## 100+

FENCING SYSTEM INSTALLED

## 50 +

COUNTRIES SERVED WORLDWIDE

## 105 +

KILOMETERS OF FENCE PROVIDED

## Products & Services

FibreFENCE fencing systems and Gates:

- Frangibility in compliance to ICAO "Aerodrome Design Manual"
- Standards Certified Radio-Transparency: no interference with electronic control systems
- High chemical and mechanical resistance
- Electrical insulation and a-magnetivity
- No visual interference for the security personnel supervising...

## Top Airports served

- Aéroport Paris-Charles-de-Gaulle
- Aeropuerto Internacional Ministro Pizarini Buenos Aires
- Calgary International Airport
- Manchester International Airport
- Orio al Serio International Airport
- Baikonur Cosmodrome
- Aéroport Le Bourget
- Vrazhdebna Airport - Sofia
- Airbus Broughton facilities
- RAF Marham airbase -Marham
