

Softech has provided systems and solutions for the airport sector since 1991, using cutting-edge technologies and high-quality equipment.

Thanks to our 30-years' experience, we are able to offer a wide range of tools to monitor, measure and supervise objects and people in motion, as well as the effects they generate: noise, pollution and much more.

All our products are user-friendly and supported by a set of additional services that help airports in minimizing their environmental impact and building up a strong relationship with travelers and citizens.

## Numbers
