

Custom's complete solutions for the aviation industry simplify printing processes in airports, improving the passenger experience especially when it comes to printing boarding cards, luggage labels, and linerless tags. Custom has engineered compact printing solutions (also multi-bin) for both check-in desks and self-service ticketing machines with eye-catching and stylish designs, meeting all primary airport needs like reliability and robustness; Custom's widest printer range for ATI is completely RFID-Ready and boasts the fastest printing speed and cutting-edge technologies on the market, always with an eco-saving approach through self-calibrating sensors and paper recovery, not wasting a single ticket. Last but not least, Custom ATI printers have the best TCO in the market. Custom ATI devices are deployed in about 500 airports worldwide.
