

Reco 3.26 is an innovative SME, specialized in the field of Artificial Intelligence applied to Computer Vision and Video Analysis.

In 2018 the company developed its first product, the S.A.R.I., for the Ministry of the Interior and the State Police, based on Intelligent Recognition (Facial Recognition) and patented in Italy and in USA.

Reco 3.26 offers innovative, sustainable and customized computer vision solutions to companies and other entities around the world. It acts with a sense of environmental and social responsibility.

Reco 3.26 responds to customer needs in terms of: Safety and Security; Border Control; Intelligent Management of Passenger Flows; Access control; Recognition of faces, behaviours and emotions; Crowd Detection; Object detection; Quality control; Smart City.

The main customers who make use of Reco technologies, operate in the following sectors: Public Administration and State Police; Airports and Ports; Stadiums; Industrial Production and Manufacturing; Private Companies.
