

Mobile and Permanent building solutions for airports as aircraft hangars, air terminals, coverages, big doors, and other aeronautical constructions.

The available sizes and customizations makes our buildings suitable to host from small ultralight aircraft and helicopters up to large airliners. The wind and snow resistance capabilities meet every national and international standard.

A wide range of accessories is available, like doors, electrical and air conditioning systems, lighting and lifting systems. Specific solutions are available for offices, warehouses, workshops, garages, and air terminals.
