Products & Services

- Lighting solutions for all large areas
- Light measurement devices – hardware and software
- High-power floodlights for all large areas including Sports Lighting
- Pole-top luminaries for parking areas and traffic
- Lighting solutions for Architecture such as projectors

When illuminating large areas, performance, durability, and efficiency are key.

The objective of illumination is to ensure precision, homogeneity, and 0% light pollution. ewo's portfolio of high-power floodlights with modular features meets all requirements and demands at airports, ports, traffic routes, logistics areas, sports facilities, and even sports stadiums. Additionally, ewo's LightLogger hardware and software for light measurements is a great addition for planners, as an easy-to-operate mobile light measurement device, for any large areas.ewo already exploited the potential offered by LED technologies for large areas.
