

Founded in 1988, Combustion and Energy Srl is an Italian Company specialized in the design and manufacture of electrical equipment.

In the early 2000s, C&E started developing a line of Aircraft Warning Lights, launched under the LUXSOLAR brand.

The know-how acquired in the Aircraft Warning Lights field and the LEDs' flexible design have allowed LUXSOLAR to create a wide range of customized LED Lighting systems for several different applications such as heliports, helidecks, airfield and marine environment.

## 30+

YEARS OF EXPERIENCE
